

Dulitha Hasith

COMPUTER SCIENCE AND ENGINEERING
UNDERGRADUATE

Education

University of Moratuwa, Sri Lanka (2022-Present)

- Undergraduate, BSc Engineering (Hons) Computer Science and Engineering
- Specializing in Data Science & Engineering
- CGPA: 3.78 (Dean's list in 3rd semester)

Harischandra National College, Negombo (2007-2020)

- GCE O/L (2017) – 9As
- GCE A/L (2020) – 3As
 - Z score – 2.6665
 - District Rank - 5 | Island Rank - 66

About Me

Eager and fast learner with a strong interest in technology, I thrive on exploring and understanding new concepts deeply. I am self-motivated, adaptable, and excel under pressure, always striving to do my best. With excellent self-management skills and a collaborative mindset, I am ready to make valuable contributions to any team or organization.

Technical Skills

Programming Languages

Python | Java | C++ | C# | JavaScript

Web Development

HTML | CSS | React | Node.js

Database Systems

MySQL | MongoDB

Machine Learning

Numpy | Pandas | Scikit-Learn

Computer Vision

OpenCV | MediaPipe

Web Scraping

Beautiful Soup

Version Controlling

Git | Jupyter Notebook

Visualization

Matplotlib | Splashkit

Projects

Vegetable Price prediction system in Sri Lanka (June 2024-Present)

Developing a system to forecast price and demand of vegetables in Sri Lanka using time series forecasting. The project involves parsing data from a daily updating website and display trends through an interactive dashboard. This system will provide real time update to stakeholders including farmers, traders etc.

Tech stack: Python, Pandas, Numpy, Tensorflow, Scikit-Learn, Streamlit

Airplane Reservation System (Sep 2023 – Nov 2023)

Developed a system for managing airplane reservations, including flight scheduling, booking, passenger management and separate admin access. My primary role involved implementing server side functionality and integrating the database.

Tech stack: React.js, MySQL, Node.js, Express

RPAL interpreter (April 2024 – May 2024)

Developed an interpreter for the RPAL (Recursive Programming Algorithmic Language), focusing on parsing, interpreting, and executing RPAL code. Implemented core features including syntax analysis, creating syntax trees, and execution of recursive functions.

Tech stack : python

Movie Recommendation System (Nov 2023-Feb 2024)

Developed a movie recommendation system using Java, demonstrating problem-solving and programming skills. The system analyzes user ratings to suggest movies, calculating average ratings and identifying similarities between users. It reads and parses data into lists and maps, and recommends movies based on these ratings.

Tech stack: Java

Skill Summary

- Teamwork
- Effective communication skills
- Ability to learn fast
- Time management
- Leadership
- Adaptable to changes
- Multitasking
- Thrive under pressure
- Self Confidence

Interests

- Solving coding problems(Project Euler)
- Astronomy
- Reading
- Hiking

Languages

- Sinhala – Native
- English – Fluent

Car game simulator using hand gestures  (Apr 2024-May 2024)
Created a car game simulator where players control the car using hand gestures. Used OpenCV and MediaPipe libraries to track hand movements and translate them into game actions like steering, accelerating, braking and gear shifting. This project didn't use traditional game development tools and focused on using computer vision for a fun and interactive experience.
Tech stack: OpenCV, mediapipe, python

Certifications

- Java Programming and software engineering fundamentals Specialization on Coursera by Duke university (5 courses)
[Show Credentials](#)
- Python for everybody specialization on Coursera by University of Michigan (5 courses) [Show Credentials](#)
- Machine Learning specialization on Coursera by Deeplearning.ai (3 courses) [Show Credentials](#)
- AWS S3 basics on Coursera by AWS Academy [Show Credentials](#)
- AWS Machine Learning Foundations by AWS academy
[Show Credentials](#)

Experience

- Web Scraping projects using python's BeautifulSoup library (from upwork)
- Guided University Students Abroad with academic level IT projects (from upwork)
- Worked as a Combined Mathematics tutor for A/L students. (2021 - 2022)

Achievements and Awards

- Finalist, Enigma Hackathon 2024
- Bronze Medal, Sri Lankan Astronomy and Astrophysics Olympiad competition
- Merit award, Sri Lankan Physics Olympiad competition

Volunteering activities and Memberships

- Organizing committee, Exmo exhibition 2023
- Organizing committee, CSE carrer fair 2023
- Organizing committee, MoraUXPlore 2024
- Member, Chess club, University of Moratuwa
- Member, Mathematics society, University of Moratuwa
- Member, IEEE Student chapter
