📍 Colombo, Sri Lanka

Summary

I am a third-year Computer Science Engineering undergraduate at the University of Moratuwa, I always try to bring a blend of academic excellence and practical experience to every project I undertake

Interests: NLP, High-performance computing, Backend Development, Computer Vision, Data Science, Prompt Engineering

Education

University of Moratuwa

B.Sc. in Computer Science and Engineering; CGPA: 3.98/4.00

Moratuwa, Sri Lanka

September 2022 – Present

Royal College

G.C.E Advanced Level: Combined Mathematics - A, Physics - A, Chemistry - A

Colombo 07, Sri Lanka

August 2020

- Z-Score - 2.7872
- Island Rank - 21 District Rank - 10

Projects

Reddit2Telegram | [GitHub](#)

February 2023 - March 2023

- a Python-based automation tool to fetch hot posts from a Reddit subreddit and post them in a Telegram channel. Implemented asynchronous processing using PythonTelegramBot and integrated Reddit API for content scraping. The bot included features for filtering posts, handling images, managing errors with real-time database updates, and NLTK-based message filtering
- Technologies: Python, Reddit API, TelegramAPI, NLTK, Natural Language, LINUX

Performance Review Analyzer | [GitHub](#)

February 2023 - March 2023

- An AI-driven platform using the ChatGPT API and Streamlit to analyze and generate insights from employee performance reviews. The platform provides sentiment analysis, key phrase extraction enabling HR teams and managers to make informed decisions.
- Technologies: Python, Open AI API, Streamlit, RAG systems

Optimizing 12 Lead ECG Classification using VGGNet and ResNet | [GitHub](#)

April 2024 - Present

- This project is an ongoing project for the George B Moody Physionet Challenge - Official Phase. The task is to classify ECGs into different classes using the images that built from the signals. The abstract that our team submitted was accepted for the CINC Conference 2024 and we will be doing the poster presentation at the conference this year.

Employee Attrition Analysis for a construction Firm | [GitHub](#)

February 2024 - July 2024

- A construction firm has noticed a high rate of employee resignations. We analyzed a dataset containing employee details, attendance, leaves, and salary information to address this issue. Our goal was to derive insights to help reduce employee attrition.

EMO AI | [GitHub](#)

July 2024 - Present

- EmoAI is an advanced AI journaling platform designed to analyze and document users' emotional states providing valuable insights for psychological professionals. Utilizing state-of-the-art Natural Language Processing (NLP) techniques

Educational Projects

Xilinx based Microprocessor design GitHub	April 2024 - Present
This project includes designing and implementing a 3-bit microprocessor using Xilinx FPGA technology. The project focused on developing the complete hardware architecture, including the control unit, datapath, and memory.	
Pint OS GitHub	April 2024 - Present
- Developed a basic interactive shell for executing user commands and managing system processes. The project involved implementing priority scheduling algorithms to optimize task management within this educational operating system. Additionally, a user program execution environment was created, integrating seamlessly with the system library to support various operations and enhance user interaction. - Technologies: C, Make Files, Operating Systems	
R_Pal GitHub	February 2024 - April 2024
- This project showcases an interpreter for the R_pal programming language meticulously implemented using Python. The interpreter features a Lexical Analyzer a Parser and a Control Stack environment all designed with an object-oriented approach. - Technologies:Python, Lexical Analyzer, Regex	

Certifications

Convolutional Neural Networks offered by DeepLearning.ai — Coursera	March 2023
Machine Learning in Production offered by DeepLearning.ai — Coursera	December 2023
Natural Language Processing in Tensorflow offered by DeepLearning.ai — Coursera	December 2023
Sequence Models offered by DeepLearning.ai — Coursera	September 2023
Share Data Through the art of Visulization offered by Google — Coursera	December 2023
Structuring Machine Learning Projects Offered by DeepLearning.ai— Coursera	December 2023
AWS Machine Learning Fundamentals— AWS	December 2023

Professional Experience

Executive Management Assistant MAS Holdings(Full-Time)	June 2021 - March 2022
During my tenure as an Executive Management Assistant Trainee in the Audit Department, I was primarily responsible for creating daily reports and analyzing trends. My role involved: creating reports to analyze the factory outputs for a particular day	
Freelance Software Engineer(Upwork)	March 2022 - Present
As a top-rated seller on Upwork, I specialize in freelancing projects related to Web Development, Machine Learning, Data Science, and AI	

Achievements

First Place in the all Island Mathematics Competition	January 2020
Abstract accepted for the CINC Conference 2024 : George B Moody Physionet Challenge 2024	June 2024
Dean’s List Placement in semesters 1 and 2 and 3: Faculty of Engineering University of Moratuwa	December 2023
Volunteer of the month AIESEC in university of Moratuwa	December 2023
Senior Cadet at Royal College	Januuary 2016-December 2019

Volunteering

AIESEC in University of Moratuwa

February 2023 - Present

IDEALIZE - Organizing Committee Vice president

HOPE - Organizing Committee Vice president

Information Management Team leader

OREPA(Student Body)

April 2024 - Present

Information Management and Public Relations Pillar Head

IEE Computer Society

October 2023 - Present

Finance Committee Team member

Academic Committee Team member

Technical Skills

Languages: Python, Java , C++, Javascript

Frameworks: Tensorflow, Pytorch, NumPy, Scikit-learn, Diffusers

LLMS/Transformer based tools GPT, Gemini, Stable Diffusion

Markup: Latex, HTML, XML

Tools: Git, Github
